

# Lesson 13: Functions

## Overview

In this lesson, you will learn how to create and call functions, then learn how to use parameters to make functions useful across many different situations

## Introduced Code

- `function myFunction() { // function body, including optional "return" command. }`
- `function myFunction(param1, param2, ..., paramN) { // function body, including optional "return" comma`
- `myFunction();`
- `myFunction(param1, ... paramN)`
